The Rise of East Asia Oct 25 2019 There is great interest in the Pacific Century and what its implications for the future will be. The rapid economic growth of East Asia was already setting the region apart from the rest of the world by the 1970s. By the 1980s the trend was seen to have spread southward to Thailand, Malaysia and Indonesia, while China's provinces had also become integral to the regional economic boom. In this exciting new study many of the ideas and expectations associated with the Pacific Century are placed under critical scrutiny. The book includes studies of particular countries such as China, Japan, South Korea, Vietnam, Indonesia and Malaysia. There is analysis of economic and political trends in the region, the reasons behind its rise and its importance on a global scale. The rise of East Asia represents an historic turning point with immense significance world-wide. This book will be of interest to anyone concerned about the new approaches to and the debate about the rise of east Asia and the coming of the Pacific Century.

Gender in Modern East Asia May 24 2022 This chronologically-organized text explores major themes in the history of gender (including politics, urban/rural lives, modernity, nationalism and war) in China, Japan and Korea, from medieval times to the present, with an emphasis on the modern era. Brief primary sources are included.

East Asia Aug 27 2022 Throughout his distinguished career, Rhoads Murphey has advocated an appreciation of the rich and unique aspects of Asian history, making his text an unparalleled success. Spanning the histories of China, Japan, Korea, Vietnam, and parts of Southeast Asia, *East Asia: A New History* furthers students' knowledge by covering a breadth of topics, including everyday life, the environment, and women in Asian history. Book jacket.

The Civil Sphere in East Asia Apr 30 2020 Examines a range of contemporary social and cultural conflicts in East Asia and the echoes they have throughout the world.

Visualizing Beauty Aug 03 2020 *Visualizing Beauty* examines the intersections between feminine ideals and changing socio-political circumstances in China, Japan, and Korea during the first half of the twentieth century. Eight essays present a broad range of visual products that informed concepts of beauty and womanhood, including fashion, interior design magazines, newspaper illustrations, and paintings of and by women. Studying "Traditional Woman" and "New Woman" as historical categories, this anthology contemplates the complex relations between feminine subjectivity and the promotion of modernity, commerce, and colonialism.

Modern East Asia Aug 23 2019 "A comprehensive history of East Asia, including extensive coverage of the region's cultural, political, economic, and social history. Coverage focuses on the narratives of China, Japan, and Korea while examining the history of each society in a larger, global context."--Back cover.

[East Asian Social Movements](#) Mar 30 2020 In the study of civil society and social movements, most cases are based in Western Europe and North America. These two areas of the world have similar histories and political ideals and structures in common which in turn, affect the structure of its civil society. In studying civil society in Asia, a different understanding of history, politics, and society is needed. The region's long traditions of centralized, authoritarian states buttressed by Confucian and in some cases Communist ideologies may render this concept irrelevant. The chapters in this international volume cover most of the areas and countries traditionally defined as belonging to East Asia: Japan, Taiwan, South Korea, Hong Kong, Singapore and China. The case studies included in this volume confront the utility of using the Western concept of civil society, represented in its most active form - social movements - to think about East Asia popular politics. Along with providing an array of important case studies of social movements in East Asia, the introduction, chapters and conclusion in the book take up three major theoretical questions: the effect of the East Asian cultural, social and institutional context upon the mobilization, activities and outcomes of social movements in that region, the role of social movements in larger transformative processes, utility of Western social movement concepts in explaining social movements in East Asia. This book will be of interest to two major groups of readers, those who study East Asia and those who pursue social movements and civil society, as well as politics more generally.

Future Trends in East Asian International Relations May 12 2021 The world has undergone significant change since the end of the Cold War. One such development is that the Asia-Pacific has become increasingly prominent in international affairs. This comprehensive study provides a detailed understanding of key issues, actors and future trends in the region.

Institutionalizing East Asia Nov 25 2019 Institutional activities have remarkably transformed East Asia, a region once known for the absence of regionalism and regime-building efforts. Yet the dynamics of this Asian institutionalization have remained an understudied area of research. This book offers one of the first scholarly attempts to clarify what constitutes institutionalization in East Asia and to systematically trace the origins, discern the features, and analyze the prospects of ongoing institutionalization processes in the world's most dynamic region. Institutionalizing East Asia comprises eight essays, grouped thematically into three sections. Part I considers East and Southeast Asia as focal points of inter-state exchanges and traces the institutionalization of inter-state cooperation first among the Southeast Asian states and then among those of the wider East Asia. Part II examines the institutionalization of regional collaboration in four domains: economy, security, natural disaster relief, and ethnic conflict management. Part III discusses the institutionalization dynamics at the sub-regional and inter-regional levels. The essays in this book offer a useful source of reference for scholars and researchers specializing in East Asia, regional architecture, and institution-building in international relations. They will also be of interest to postgraduate and research students interested in ASEAN, the drivers and limits of international cooperation, as well as the role of regional multilateralism in the Asia-Pacific region.

East Asia in the World Apr 23 2022 This accessible collection examines twelve historic events in the international relations of East Asia.

Patriotism in East Asia Aug 15 2021 Current territorial disputes between the Northeast Asian countries have stimulated a resurgence of bellicose nationalism, and threaten to upset recent efforts to achieve regional cooperation and economic integration in East Asia. Alongside this, debates over pre-1945 Japanese wartime atrocities, aggravated by still unresolved territorial disputes between Japan and its neighbours have triggered diplomatic conflicts in Japanese-South Korean relations, virulent anti-Japanese protests in China, and a dramatic increase of right-wing nationalism in Japan. Many have perceived these phenomena as inevitable corollaries, inasmuch as they regard the Northeast Asian countries as historically homogeneous and nationalistic states, and have begun to question the feasibility of the post-Cold War efforts to replace nationalism with a moderate version of civic solidarity. This book contributes to the debates surrounding patriotism and nationalism in Northeast Asia, and investigates the feasibility of non-ethnocentric patriotism in countries across the region. In doing so, it highlights the differences between Asian and Western concepts of republican patriotism via theoretical discussions of the evolving discourses on nationalism, patriotism, democracy and civic solidarity. The chapters combine theoretical discussion with historical case studies such as modern state building in late Qing Dynasty; nineteenth century Japanese political thought; and the twentieth century Korean independence movement. In turn, the contributors explore the possibilities for republican patriotism in contemporary Northeast Asia, with a focus on the Chinese term *minzu*, and the possibilities it holds for an alternative configuration of national identity in the age of globalization; Maruyama Masao's theories of nationalism in Japan; the National Security Law in South Korea, and the impact it has had on the country's political culture; and the Taiwanese movement for self-governance. Patriotism in East Asia will appeal to students and scholars of Asian politics, political theory, Asian history and peace studies, as well as to those interested in issues of nationalism.

Greening East Asia Dec 07 2020 "East Asia has a fifth of the world's population and consumes over half of the world's coal, a quarter of its petroleum products, and 10 percent of its natural gas. It produces a third of the world's greenhouse gas (GHG) emissions, making it a major contributor to climate change. Following World War II, emphasis on economic development led first Japan, then Taiwan and the Republic of Korea, and now the People's Republic of China to experience rapid economic growth. This process has brought environmental challenges, evoking governmental concern and environmental movements. The region is an excellent arena in which to study the complex dynamics of environmental politics, as its four countries share ecological, social, cultural, and political characteristics, but they vary in size, resource wealth, history, and political systems. This enables analysis of how these factors can influence environmental politics and how national policy can become reshaped by environmental advocacy. East Asia's pro-environmental shift represents a fundamental change from purely developmental to "eco-developmental," recognizing that greater environmental sustainability is critical for economic growth. Topics addressed in the case studies presented here include Japan after Fukushima, genetically modified food in Japan and Korea, coal plants and wind turbines in China, energy security in Taiwan, Chinese grassroots environmental NGOs, and sustainable rural development in Korea"--

The Languages of East and Southeast Asia Jul 22 2019 "This book introduces the linguistic diversity of East and Southeast Asia. It contains treatments of diverse areas including: word origins, cultural key words, tones and sounds, language families and typology, key syntactic structures, writing systems and communicative style" --Provided by publisher.

A History of East Asia Jun 25 2022 The second edition of Charles Holcombe's acclaimed introduction to East Asian history from the dawn of history to the twenty-first century.

Rising East Asia Jan 28 2020 *Rising East Asia* by Chien-pin Li helps readers understand the dynamic changes to China, Japan, and Korea since the end of World War II. Although the three countries have experienced stellar economic growth, there have also been shifts in political dynamics, social order, and security landscapes. To help people understand the past and present of the region, and develop well-informed opinions about its future, Li offers a book for East Asian Politics courses that reflects interdisciplinary collaboration—one that brings the scholarly debate in comparative politics and international relations to bear on the rich information and knowledge accumulated from East Asian studies. Each section is organized around the pursuit of three policy goals: economic prosperity, political governance, and national security. Whatever their position may be, the future of the region is likely to have major impacts on the rest of the world.

Global East Asia Feb 21 2022 "Drawing on work in a range of disciplines-including history, anthropology, demography, development, environmental studies, political studies, health, sociology and the arts-this work approaches East Asia from new perspectives. The book looks at contemporary Japan and Korea and focuses on many facets of Chinese culture, artistic production, economic development, digital issues, education and international collaboration" -

East Asia Feb 27 2020 Histories of East Asia traditionally emphasize China and Japan, and neglect Korea and Vietnam. Essentially, 20th century East Asia is re-written into the past, as though China and Japan was always the core of East Asian development. This is not at all how East Asia developed. Chinese prehistoric cultures became historic in the 18th century B.C.! Japan was not part of East Asia for over 2300 more years. By studying periods of Chinese unity and disunity, and their effects on Chinas neighbors, Korea and Vietnam, a distinct culture zone, East Asia, gradually emerged, and slowly included Japan. The main elements of East Asiacultural, social, political, philosophical, religious and linguistic were derived from China, but the others were not minor replicas of China. Each was unique: its people ethnically distinct, from China and each other; its native language, and linguistic blend with Chinese, also unique. Korea and Vietnam resisted Chinese colonization, but adopted and adapted advance Chinese elements to their own needs. Emerging later, Japan underwent wholesale adoption of Tang Chinas advances, replicated in the 19th century, when Japan was the first East Asian country to modernize. Spanning some thirty-eight centuries, from the 18th century B.C. to 2012 A.D., this diversity with common elements derived from China, is a major theme of this work. It is often overlooked by those who prefer general views, based on surface impressions, to more complex realities. The former often lead to mistakes; the latter become the basis for more sound understanding. After all, these four countries and people share the eastern end of the Eurasian continent, yet each countrys geographic situation is also unique. As the twenty-first century continues to unfold, this new approach to East Asia should help to produce clearer and more accurate understanding of this important world region.

East Asia Before the West Nov 18 2021 From the founding of the Ming dynasty in 1368 to the start of the Opium Wars in 1841, China has engaged in only two large-scale conflicts with its principal neighbors, Korea, Vietnam, and Japan. These four territorial and centralized states have otherwise fostered peaceful and long-lasting relationships with one another, and as they have grown more powerful, the atmosphere around them has stabilized. Focusing on the role of the "tribute system" in maintaining stability in East Asia and fostering diplomatic and commercial exchange, Kang contrasts this history against the example of Europe and the East

Asian states' skirmishes with nomadic peoples to the north and west. Scholars tend to view Europe's experience as universal, but Kang upends this tradition, emphasizing East Asia's formal hierarchy as an international system with its own history and character. His approach not only recasts common understandings of East Asian relations but also defines a model that applies to other hegemonies outside of the European order.

East Asia in the World Sep 28 2022 From the Foundations in Global Studies series, this text offers students a fresh, comprehensive, multidisciplinary entry point to East Asia. After a brief introduction to the study of East Asia, the early chapters of the book survey the essentials of East Asian history; important historical narratives; and the region's languages, religions, and global connections. Students are guided through the material with relevant maps, resource boxes, and text boxes that support and guide further independent exploration of the topics at hand. The second half of the book features interdisciplinary case studies, each of which focuses on a specific country or region and a particular issue. Each chapter gives a flavor for the cultural distinctiveness of the particular country yet also draws attention to global linkages. Readers will come away from this book with an understanding of the larger historical, political, and cultural frameworks that shaped East Asia as we know it today, and of current issues that have relevance in Asia and beyond.

East Asia and the World Economy Sep 23 2019 In contrast to the literature's focuses on market, culture, state, and dependency, East Asia and the World Economy points to the crucial role of geopolitical and regional factors in East Asian development. The authors provide a cohesive review of the world-systems model as it applies to East Asia, exploring its intellectual heritage, the historical context through which it arose, its basic assumptions, and its policy implications. To illustrate how this model works in East Asia, the authors examine the economies of Hong Kong, Taiwan, China, North Korea, and Japan. The result is a fascinating study that demonstrates how the world-systems model provides a more focused explanation of East Asia's peculiar pattern of development.

East Asia Beyond the History Wars Oct 05 2020 Despite East Asia's economic growth, ghosts of history continue to trouble relations between the key countries of the region. Unhappy legacies of Japan's military expansion in pre-war Asia prompt on-going calls for apologies, while conflicts over ownership of cultural heritage cause friction between China and Korea, and no peace treaty has ever been signed to conclude the Korean War. For over a decade, the region's governments and non-government groups have sought to confront the ghosts of the past, and focusing particularly on popular culture and grassroots action, East Asia beyond the History Wars explores these East Asian approaches to historical reconciliation.

Modern East Asia Mar 22 2022 This concise history of modern East Asia offers students and general readers an understanding of this region from a global perspective. It is an introductory text for college survey courses in Asian and international studies. After discussion of the regional concept, it describes East Asia's geographical, human, cultural, economic, social, and political setting and three major belief systems - Confucianism, Buddhism, and Islam. It includes the Chinese, Japanese, Koreans, Vietnamese, Thai, Burmese, Indonesians, Filipinos, and others and describes their interactions with each other and Imperial China. The author writes about European expansionism and East Asians' responses to civilizational challenge; nationalism in reaction to European colonial rule; and rise of Imperial Japan. The book traces Japan's bid to lead a pan-Asianist revolt against twin threats of Western liberalism and Soviet communism, and the Pacific War. This history spans Cold War era, from postwar U.S. hopes for a "Pax Americana" to division of East Asia into communist and anti-communist blocs. The Sino-Soviet split and Sino-American rapprochement of early 1970s open the way to "East Asian miracle" and resurgence of East Asian regionalism. The author considers prospects for continued economic dynamism and balance of nationalism and pan-Asian trends--Publisher's description.

East Asia at the Center Jul 26 2022 A common misconception holds that Marco Polo "opened up" a closed and recalcitrant "Orient" to the West. However, this sweeping history covering 4,000 years of international relations from the perspective of China, Japan, Korea, and Southeast Asia shows that the region's extensive involvement in world affairs began thousands of years ago. In a time when the writing of history is increasingly specialized, Warren I. Cohen has made a bold move against the grain. In broad but revealing brushstrokes, he paints a huge canvas of East Asia's place in world affairs throughout four millennia. Just as Cohen thinks broadly across time, so too, he defines the boundaries of East Asia liberally, looking beyond China, Japan, and Korea to include Southeast Asia. In addition, Cohen stretches the scope of international relations beyond its usual limitations to consider the vital role of cultural and economic exchanges. Within this vast framework, Cohen explores the system of Chinese domination in the ancient world, the exchanges between East Asia and the Islamic world from the thirteenth to the seventeenth centuries, and the emergence of a European-defined international system in the eighteenth and nineteenth centuries. The book covers the new imperialism of the 1890s, the Manchurian crisis of the early 1930s, the ascendancy of Japan, the trials of World War II, the drama of the Cold War, and the fleeting "Asian Century" from the mid-1970s to the mid-1990s. East Asia at the Center is replete with often-overlooked or little-known facts, such as: A record of persistent Chinese imperialism in the region Tibet's status as a major power from the 7th to the 9th centuries C.E., when it frequently invaded China and decimated Chinese armies Japan's profound dependence on Korea for its early cultural development The enormous influence of Indian cuisine on that of China Egyptian and Ottoman military aid to their Muslim brethren in India and Sumatra against European powers Extensive Chinese sea voyages to Arabia and East Africa—long before such famous Westerners as Vasco da Gama and Christopher Columbus took to the seas East Asia at the Center's expansive historical view puts the trials and advances of the past four millennia into perspective, showing that East Asia has often been preeminent on the world stage—and conjecturing that it might be so again in the not-so-distant future.

Sovereignty and Authenticity Sep 16 2021 In this powerful and provocative book, Prasenjit Duara uses the intriguing case of Manchukuo--the Japanese puppet state in northeast China from 1932-1945--to explore how such antinomies as imperialism and nationalism, modernity and tradition, and governmentality and exploitation interacted in the post-World War I period. He argues that Manchukuo, as a transparently constructed nation-state, offers a unique historical laboratory for examining the utilization and transformation of circulating global forces mediated by the East Asian modern. With its sweepingly original theoretical and comparative perspectives on nationalism and imperialism, this book will be essential reading for all those interested in contemporary history. Protecting the Weak in East Asia Dec 19 2021 This book investigates public claims for the protection of weak groups and interests in Japan and China from the nineteenth century to the present day. Taking an interdisciplinary approach, it engages with ongoing global debates relevant to both Western and non-Western societies whilst also providing an historically informed analysis of contemporary issues. Using case studies on disaster victims, employee well-being, cultural heritage and animal welfare, this book analytically distinguishes between framing, mobilisation and institutionalisation processes. It examines these processes at the intersections of international and domestic spheres and, in doing so, demonstrates how drives for protection are formulated, contested and played out in practice. Ultimately however, this book argues that claims for protection do not necessarily translate into effective measures, but may in fact entail ambiguous or negative outcomes for the protected 'weak'. Protecting the Weak in East Asia makes a significant contribution to the empirical and theoretical research into the transformation of East Asian societies. As such, it will appeal to students and scholars of Asian history, Asian culture and society and East Asian Studies more broadly.

The Economic Rise of East Asia Jan 08 2021 In light of the growing global economic importance of East Asia, this book analyzes and compares the extraordinary development paths and strategies of Japan, South Korea, and China. It examines both the factors that enabled these countries' prolonged periods of high-speed economic growth, and the reasons for their subsequent "cool-downs." In addition, the book illustrates how their development strategies served as role models for one another, and what current and future developing countries can learn from the East Asian success stories. This book will appeal to scholars and students of economics and development studies with an interest in the East Asian development model.

Japan and ASEAN in East Asia Mar 10 2021 This book is the text of the Singapore Lecture delivered by Junichiro Koizumi on 14 January 2002.

East Asia Sep 04 2020 In East Asia : Identities and Change in the Modern World, accomplished historian R. Keith Schoppa uses the prism of cultural identities to examine the four countries that make up the East Asian cultural sphere—China, Japan, Korea, and Vietnam—from roughly 1700 to the present. This book explores modern East Asian history through the themes of identities and change.

East Asia in the World Feb 09 2021 From the Foundations in Global Studies series, this text offers students a fresh, comprehensive, multidisciplinary entry point to East Asia. After a brief introduction to the study of East Asia, the early chapters of the book survey the essentials of East Asian history; important historical narratives; and the region's languages, religions, and global connections. Students are guided through the material with relevant maps, resource boxes, and text boxes that support and guide further independent exploration of the topics at hand. The second half of the book features interdisciplinary case studies, each of which focuses on a specific country or region and a particular issue. Each chapter gives a flavor for the cultural distinctiveness of the particular country yet also draws attention to global linkages. Readers will come away from this book with an understanding of the larger historical, political, and cultural frameworks that shaped East Asia as we know it today, and of current issues that have relevance in Asia and beyond.

Globalisation and Economic Security in East Asia Nov 06 2020 What is the relationship between globalization and economic security? Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis. Viewing traditional neorealist conceptions of economic security as overly narrow, this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism, and the insecurities it generates for societies and individuals. This uniquely open-ended approach to conceptualizing economic security is supported by the East Asian experience. The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development, particularly following the 1997 to 1998 Asian financial crisis, other, more realist conceptions of economic security have not become irrelevant. This is also an exploration of whether and how national, regional and multilateral institutions, as well as non-state regional mechanisms, help policy makers meet the task of governing in the interests of economic security. This book will be of great interest to all students and scholars of international relations, international political economy of East Asia globalization and security studies.

Routledge Handbook of Memory and Reconciliation in East Asia Oct 17 2021 Decades after the end of the World War II East Asia continues to struggle with lingering animosities and unresolved historical grievances in domestic, bilateral and regional memory landscapes. China, Japan and the Korea share a history of inter- and intra-violence, self-other identity construction and diametrically opposed interpretations of the past. Routledge Handbook of Memory and Reconciliation in East Asia offers a complete overview of the challenges of national memory and ideological rivalry for reconciliation in the East Asian region. Chapters provide authoritative analyses of contentious issues such as comfort women, the Nanjing massacre, history textbook controversies, shared heritage sites, colonial rule, territorial disputes and restitution. By interweaving memory, human rights and reconciliation the contributors actively explore real prospects of redressing past wrongs and achieving peaceful coexistence at personal as well as governmental levels. Bringing together an international team of experts, this book is an essential read for students and scholars of East Asian studies, anthropology, gender studies, history, international relations, law, political science, and sociology, and for those interested in memory and reconciliation issues.

Routledge Handbook of Democratization in East Asia Jan 20 2022 This handbook provides a comprehensive analysis of the dynamics and prospects of democratization in East Asia. A team of leading experts in the field offers discussion at both the country and regional level, including analysis of democratic attitudes and movements in China, Japan, South Korea, and Taiwan. Evaluating all the key components of regime evolution, from citizen politics to democratic institutions, the sections covered include: Regional Trends and Country Overviews, Institutions, Elections, and Political Parties, Democratic Citizenship, Democratic Governance, The Political Economy of Democratization, Examining the challenges that East Asian emerging democracies still face today, as well as the prospects of the region's authoritarian regimes, the Routledge Handbook of Democratization in East Asia will be useful for students and scholars of East Asian Politics, Comparative Politics, and Asian Studies. Book jacket.

Heritage and Religion in East Asia Jun 20 2019 Heritage and Religion in East Asia examines how religious heritage, in a mobile way, plays across national boundaries in East Asia and, in doing so, the book provides new theoretical insights into the articulation of heritage and religion. Drawing on primary, comparative research carried out in four East Asian countries, much of which was undertaken by East Asian scholars, the book shows how the inscription of religious items as "Heritage" has stimulated cross-border interactions among religious practitioners and boosted tourism along modern pilgrimage routes. Considering how these forces encourage cross-border links in heritage practices and religious movements in China, Taiwan, South Korea, and Japan, the volume also questions what role heritage plays in a region where Buddhism, Taoism, and other various folk religious practices are dominant. Arguing that it is diversity and vibrancy that makes religious discourse in East Asia unique, the contributors explore how this particularity both energizes and is empowered by heritage practices in East Asia. Heritage and Religion in East Asia enriches understanding of the impact of heritage and religious culture in modern society and will be of interest to academics and students working in heritage studies, anthropology, religion, and East Asian studies.

The Book Worlds of East Asia and Europe, 1450-1850 Jun 13 2021 This volume provides the first comparative survey of the relations between the two most active book worlds in Eurasia between 1450 and 1850. Prominent scholars in book history explore different approaches to publishing, printing, and book culture. They discuss the extent of technology transfer and book distribution between the two regions and show how much book historians of East Asia and Europe can learn from one another by raising new questions, exploring remarkable similarities and differences in these regions' production, distribution, and consumption of books. The chapters in turn show different ways of writing transnational comparative history. Whereas recent problems confronting research on European books can instruct researchers on East Asian book production, so can the privileged role of noncommercial publications in the East Asian textual record highlight for historians of the European book the singular contribution of commercial printing and market demands to the making of the European printed record. Likewise, although production growth was accompanied in both regions by a wider distribution of books, woodblock technology's simplicity and mobility allowed for a shift in China of its production and distribution sites farther down the hierarchy of urban sites than was common in Europe. And, the different demands and consumption practices within these two regions' expanding markets led to different genre preferences and uses as well as to the growth of distinctive female readerships. A substantial introduction pulls the work together and the volume ends with an essay that considers how these historical developments shape the present book worlds of Eurasia. "This splendid volume offers expert new insight into the ways of producing, financing, distributing, and reading printed books in early modern Europe and East Asia. This is comparative history at its best, which leaves us with a better understanding of each context and of the challenges common to book cultures across space and time." —Ann Blair, author of *Too Much to Know: Managing Scholarly Information before the Modern Age* and professor of history, Harvard University "This engrossing account of the history of the book by leading specialists on the European and East Asian publishing worlds takes stock of what we know—and how much we still need to know—about the places that books had in the lives of our early modern forebears. Each chapter is masterful state-of-the-field coverage of its subject, and together they set a new standard for future studies of the book, East and West." —Timothy Brook, author of *The Troubled Empire: China in the Yuan and Ming Dynasties*

The East Asian Challenge for Human Rights Jul 02 2020 The East Asian Challenge for Human Rights shows that critical intellectuals in East Asia have begun to chart a middle ground between the extremes of the international debate on human rights, making particular headway in the areas of group rights and economic, social, and cultural (ethnic minority) rights. The chapters form a collective intellectual inquiry into the following areas: critical perspectives on the "Asian values" debate; theoretical proposals for an improved international human rights regime with greater input from East Asians; the resources within East Asian cultural traditions that can help promote human rights; and key human rights issues facing East Asia as a result of rapid economic growth in the region.

The European Union and East Asia Apr 11 2021 This text analyses the economic relationship that has evolved between the European Union and East Asia, and its future prospects, especially in the wake of the financial crisis that shook East Asia.

Remapping East Asia Dec 27 2019 An overarching ambiguity characterizes East Asia today. The region has at least a century-long history of internal divisiveness, war, and conflict, and it remains the site of several

nettlesome territorial disputes. However, a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia. In *Remapping East Asia*, T. J. Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region-building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics. This collection is about the people, processes, and institutions behind that region-building. In it, experts on the area take a broad approach to the dynamics and implications of regionalism. Instead of limiting their focus to security matters, they extend their discussions to topics as diverse as the mercurial nature of Japan's leadership role in the region, Southeast Asian business networks, the war on terrorism in Asia, and the political economy of environmental regionalism. Throughout, they show how nation-states, corporations, and problem-specific coalitions have furthered regional cohesion not only by establishing formal institutions, but also by operating informally, semiformally, or even secretly.

East Asian Business in the New World Jun 01 2020 *East Asian Business in the New World: Helping Old Economies Revitalize* discusses how to conduct business in East Asia. The main objective of the book is to help American workers and businesses gain competitive advantages in a global marketplace in which the emerging Asian economies are rapidly becoming major players. The American economy appears to be on decline, especially relative to the rapidly rising economies in places such as China. To revitalize the American economy and those of the 'old world', we must pay close attention to the economies with which America competes. The objective of this book is two-fold, with an initial focus on the opportunities and challenges of doing business in East Asia that includes tactics that will help readers understand Asian economies and business practices so that they can compete more successfully in the region. Secondly, the book seeks to teach readers how the U.S. can learn from East Asia in revitalizing its own economy. This is what sets the book apart as it analyzes the social institutions in major Asian countries, including the political, economic, and cultural institutions, and then compares them with the institutions in the U.S., identifying the strengths and weaknesses of U.S. institutions and providing strategic and policy recommendations that may help the U.S. economy and American firms compete in the global marketplace. Discuss how America and older economies can learn from Asia Provides a theoretical framework of rule-based vs. relation-based governance to help readers understand the differences in doing business in Asia vs. doing business in mature economies Offers business insights based on the author's business experience in Asia Approaches the topic from a comparative perspective
